

SOMASHEKHAR POKALA

Enterprise Mobile Platform Engineering | Flutter Architecture | Cross-Platform Solutions | Full-Stack API Development
(.NET/C#) | AI-Accelerated Engineering

Senior **Mobile Platform Engineer** with **7+ years** of experience delivering enterprise-scale **Flutter, Android, and iOS solutions** with **full-stack** backend experience building **REST APIs** and admin UI in **C#/.NET**. Proven expertise in scaling **white-label platforms** for **1,500+ brands**, leveraging **AI-assisted development**, modernizing **mobile architecture**, optimizing **CI/CD**, and delivering secure and high-performance applications.

PROFILE SUMMARY

- Strong background in **mobile application architecture**, **application lifecycle management**, and **cross-functional collaboration**, delivering robust, secure, and high-performance mobile solutions aligned with evolving business objectives.
- Experienced in driving **engineering excellence** by mentoring developers, providing technical leadership, improving code quality, estimating development efforts, and fostering a collaborative, high-performing Agile team culture.
- Adept at optimizing **application performance**, reliability, and user experience through proactive monitoring, automated quality assurance, analytics-driven enhancements, and scalable engineering best practices.
- Engineered & scaled** an enterprise **White-Label Mobile Platform** supporting **1,500+ customer brands** across Android & iOS.
- Rebuilt** the next-generation **Consumer Mobile Application** in **2 months** within a **4-member engineering team** using **AI-assisted development**.
- Expertise in **CI/CD**, release governance, and production deployment strategies, successfully managing enterprise application releases while ensuring platform stability, operational continuity, and accelerated delivery cycles.
- Passionate about **continuous innovation**, leveraging **Agile/Scrum methodologies**, data-driven decision-making, and emerging technologies to deliver business-critical mobile solutions that improve customer engagement, operational efficiency, and product excellence.
- Full-stack** contributor spanning mobile and backend: designed and built **C#/.NET REST APIs** and **ASP.NET admin UI** for organization configuration, center settings, deposits, and membership workflows, backed by custom **SQL Server** stored procedures — including production escalation fixes across **API, UI, and database layers** — and implemented the corresponding data layer on the **Flutter mobile app**.

CORE COMPETENCIES

Enterprise Mobile Platform Development | Stakeholder Collaboration | White-Label Product Engineering | Agile Product Development | Product Lifecycle Management | Scalable Application Delivery | Release & Deployment Governance | Customer-Centric Product Innovation | Engineering Leadership & Mentoring | Platform Modernization | Mobile Performance Engineering | Mobile Solution Architecture

TECHNICAL SKILLS

Category	Skills / Technologies
Programming Languages	Dart, C#/.NET, Java, Kotlin, SQL
Frameworks & Architecture	Flutter, ASP.NET, MVVM, Cross-Platform Mobile Development
State Management	Provider, Bloc
Firebase Services	Firebase Analytics, Firebase Crashlytics, Firebase Cloud Messaging (FCM)

Mobile Development	Flutter SDK, Android, iOS, Flutter Web, REST API Integration, Push Notifications, Deep Linking, Maps SDK Integration, WebView & Payment Redirection Handling, White-Label App Architecture
Native Platform Integration	Platform Channels, Native Plugin Development (Android/iOS), Shared Preferences/Keychain Bridging
SDK & Platform Maintenance	Flutter SDK Version Upgrades, Breaking-Change Remediation, Dependency Compatibility Management
Backend & APIs	ASP.NET Web API, RESTful API Design, ASP.NET Admin/Backend UI, Stored Procedures
Database	SQL Server (SSMS)
CI/CD & Release Management	Jenkins, Fastlane, App Store Release Management (compliance & rejection resolution & publishing), Google Play Store Release Management (compliance & rejection resolution & publishing)
Testing & Quality Assurance	Unit Testing, Widget Testing, Integration Testing, End-to-End (E2E) Testing, Manual Testing
Developer Tools & IDEs	Git, Android Studio, Visual Studio Code (VS Code), Xcode, Claude Code (AI-Assisted Development)

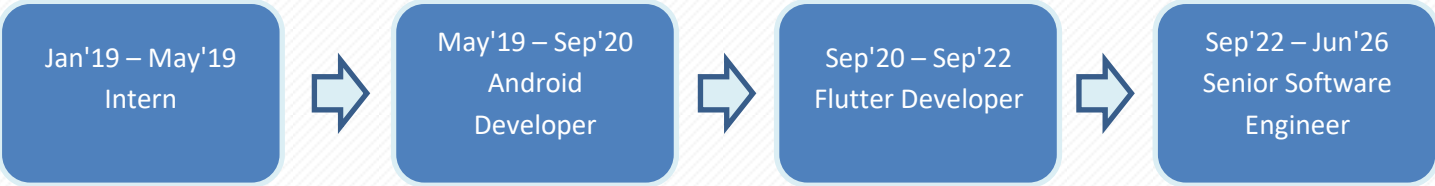

ACADEMIC DETAIL

2019 | B.Tech in Computer Science & Engineering | Vardhaman College of Engineering, Hyderabad

WORK EXPERIENCE

Zenoti | May 2019 – Jun 2026 | Played Various Progressive Roles

Growth Path:

Key Result Areas:

- Spearheaded the **end-to-end evolution of enterprise mobile platforms**, progressing from native Android development to architecting scalable **cross-platform solutions** supporting large-scale customer deployments.
- Drove **mobile platform modernization initiatives** by enabling reusable architectures, improving maintainability, accelerating feature delivery, and enhancing long-term product scalability.
- Owned the complete **application lifecycle management**, encompassing feature engineering, production support, release governance, customer-specific deployments, and continuous platform enhancements.
- Led **high-impact engineering initiatives** by translating business requirements into reliable mobile experiences through close collaboration with Product, Design, QA, Backend, and leadership stakeholders.
- Established robust **quality engineering practices** through automated testing strategies, proactive monitoring, performance optimization, and data-driven application health management.
- Strengthened **engineering excellence and delivery predictability** through technical mentoring, effort estimation, code quality governance, and knowledge sharing across development teams.

- Enabled **continuous innovation and operational efficiency** by adopting AI-assisted development methodologies, streamlining engineering workflows, and accelerating time-to-market for business-critical capabilities.
- Delivered **full-stack solutions** spanning **C#/.NET** APIs, **ASP.NET** backend UI, SQL Server stored procedures, and Flutter mobile integration for organization- and center-level configuration features.
- **Resolved production escalations** across API, UI, and stored-procedure layers for gift cards, refunds, closed appointments, and therapist-related workflows, ensuring data integrity and **timely issue resolution**.
- Maintained platform currency by performing **Flutter SDK upgrades**, resolving breaking changes and dependency conflicts to keep the app stable across releases.
- **Managed App Store and Play Store release compliance**, resolving submission rejections and adapting to evolving platform policy requirements.
- Built a native platform bridge (Android/iOS) via a **custom Flutter plugin** to access legacy native app data where no existing package was available.

Key Achievements:

- **Delivered** high-performance **mobile applications** supporting deployments of up to **300,000+ Monthly Active Users (MAU)**.
- **Owned end-to-end delivery** of the **Consumer Mobile Platform**, ensuring seamless releases during critical team transitions.
- **Managed 3–4 annual production releases** plus hotfix deployments through robust **Release Management** practices.
- **Associated Team Member** in migration of **Native Android** to **Cross-Platform Flutter Architecture**, improving scalability and development efficiency.
- **Implemented automated testing** (Unit, Widget & E2E), strengthening **application quality** and release reliability.
- **Mentored** engineering teams, driving **technical excellence**, code quality, and delivery best practices.
- **Enabled data-driven decisions** through **Firebase Analytics** and **Crashlytics** for proactive application monitoring.
- **Collaborated** with cross-functional stakeholders to deliver **business-critical mobile solutions** and enhance customer experience.
- **Designed and developed** C#/.NET REST APIs to retrieve and update organization-level settings for the consumer application, and implemented the corresponding data layer on the Flutter mobile app.
- **Built backend admin UI** in ASP.NET for center-level settings, working hours configuration, and deposit management, alongside the supporting APIs.
- Developed membership and package redemption flag APIs, and guest-level data push functionality across select features.
- **Engineered** a prerequisite validation API and backend UI evaluating org-level prerequisite rules against guest appointment history to determine eligibility and valid date ranges — including authoring the underlying SQL Server stored procedures.
- **Investigated and resolved escalations** involving gift cards, refunds, closed appointments, and therapist-related data — fixing root causes across API, UI, and stored procedure layers.
- **Owned select features end-to-end**: API design, backend UI, database logic, and Flutter mobile integration.
- **Developed a custom Flutter plugin using platform channels** to read stored auth tokens from native Android SharedPreferences and iOS Keychain, enabling seamless auto-login for users migrating from the native app to Flutter.
- Integrated Maps SDK and handled WebView-based payment redirection flows within the Flutter application.
- **Extended and maintained a Flutter Web** build of the consumer application for a dedicated web-based customer deployment, alongside the Android/iOS apps.
- **Resolved recurring App Store/Play Store submission rejections** by identifying and fixing **compliance issues** pre- and post-release.
